CORPORATE ENVIRONMENTAL POLICY

We are TABOCA, a mining and metallurgical company engaged in the beneficiation of cassiterite and columbite ores for the production and commercialization of tin and ferroalloys containing niobium and tantalum.

We reaffirm our commitment to environmental protection and stewardship in the development of our activities, in alignment with our vision, mission, and values.

Our Purpose:

We improve lives by transforming minerals into well-being

We are committed to:

1. Protecting the environment and natural resources, including water, soil, air, and biodiversity, by preventing contamination risks and minimizing potential adverse environmental impacts.
2. Establishing environmental objectives and targets, periodically measuring performance, and defining strategic actions to achieve them.
3. Identifying, assessing, preventing, monitoring, and mitigating the environmental impacts of our activities, while continuously seeking to control and minimize atmospheric emissions, including greenhouse gas (GHG) emissions, solid waste generation, and the consumption of natural resources, by adopting best practices that promote the sustainable use of natural resources.
4. Identifying, assessing, and managing risks and opportunities, minimizing negative effects and enhancing positive outcomes.
5. Complying with applicable legal requirements and other environmental obligations.
6. Implementing, maintaining, and continuously improving our Environmental Management System.
7. Promoting the development of an environmental culture based on best practices for preventing and mitigating adverse environmental impacts.

This policy will be reviewed and updated every 3 years or earlier, if necessary
